

A guide to my

mysterious dyslexic ways

I might find it difficult to find places

Why?

It's hard for us to understand our relationship with our surroundings, as well as following directions such as left and right.

I have a great sense of imagination

Why?

Rather than thinking in words, many people with dyslexia think in images.

We are good at seeing in 2D and 3D as well as colour, tone and texture.

We can often visualise art in our minds before putting pen to paper!

I am late sometimes

Why?

People with dyslexia can lose track of time.

We tend to live in the present, not the past or future.

I like solving puzzles

Why?

Because I think outside of the box and have an unusual approach to thinking about things. This helps me have a lot of 'aha' moments when I'm problem solving!

Sometimes I get frustrated

Why?

1 in 10 people in the UK have dyslexia*, but this means that 9/10 don't!

The world I live in is built and designed for non-dyslexic people. My brain is just wired differently.

*Estimate from Dyslexia Scotland

Dyslexia doesn't just mean that reading and writing is more challenging for me. It can affect my life in a number of ways.

The good news is that there are lots of strategies that can be put in place to help me and you.

Thank you for understanding my dyslexic ways.
